Dear Hiring Manager,

I am writing to express my interest in the Electrotechnology Apprenticeship position and am excited about the opportunity to begin a career in the electrical industry. I am a motivated, reliable and hardworking individual with a genuine passion for electrical systems, technology and hands-on trade work. I am eager to learn from experienced tradespeople and develop the skills required to become a well-rounded electrician.

After completing my Diploma of Information Technology, I realised my strengths and interests were better suited to practical, hands-on work that combines technical problem-solving with real-world applications. This led me to pursue a career in the electrical trade, where I can apply analytical thinking while developing valuable practical skills in a dynamic and rewarding industry.

Through my experience in warehouse operations, construction, retail and landscaping, I have developed strong safety awareness, a solid work ethic and the ability to perform effectively in physically demanding and fast-paced environments. These roles have strengthened my teamwork, communication and problem-solving abilities while reinforcing the importance of reliability, attention to detail and following safe work practices.

I currently hold a White Card, Driver's Licence, First Aid & CPR certification, LF Forklift Licence and Certificate II in Construction. I am also scheduled to complete my Working Safely at Heights ticket on 26 June. Outside of work, I actively expand my knowledge of electrical systems, fault finding, automation and industrial technologies, as I have a strong interest in the industry and enjoy learning how electrical equipment and control systems operate.

While my long-term goal is to further develop my knowledge in areas such as instrumentation, automation and industrial control systems, I am eager to gain broad experience across all aspects of the electrical trade and build a strong foundation as an electrician. I am committed to continuous learning and am excited by the opportunity to develop both my technical and practical skills throughout an apprenticeship.

I take pride in being punctual, dependable and willing to put in the effort required to succeed. I am willing to relocate for the right opportunity and am prepared to travel as required to support my training and career development.

Thank you for considering my application. I would welcome the opportunity to discuss how my attitude, work ethic and enthusiasm for the electrical industry would make me a valuable addition to your team.

Kind regards, Leon Van Der Walt
