PROFESSIONAL SUMMARY

I am a motivated and safety-conscious Electrical Apprentice candidate with hands-on experience across warehouse operations, construction, retail and support work environments. I hold a White Card, Driver's Licence, First Aid & CPR, LF Forklift Licence, Certificate II in Construction and Diploma of Information Technology.

I have a strong interest in the electrical industry and am eager to gain broad experience across residential, commercial, industrial and maintenance environments to develop a well-rounded foundation as an electrician. While my long-term career goal is to specialise in Instrumentation, Automation and Process Control, I am committed to learning all aspects of the electrical trade and developing strong practical skills under the guidance of experienced tradespeople.

My background has helped me develop strong problem-solving abilities, attention to detail, reliability and a safety-first mindset. I enjoy working with electrical systems, technology and fault-finding and I am particularly interested in PLCs, instrumentation, industrial control systems and emerging automation technologies. I am eager to build a long-term career in the electrical industry, contribute positively to a team environment and continuously expand my technical knowledge and practical experience.

LICENCES & CERTIFICATIONS
